Water-Based inks

Aqueous Inks That Flow With Your Needs

# EDEN™ Water-Based inks

Aqueous Inks That Flow With Your Needs

Bordeaux's EDEN water-based ink series are highly rated for their safety and environmental benefits. These inks are truly environmental friendly, fire-proof and do not require any ventilation.

Bordeaux's comprehensive understanding of inkjet printing technology has enabled us to formulate dye and pigmented water based inks for both types of printhead technologies, Piezo & Thermal, to cover all types of water based wide format applications.

Compared with other manufacturers, Bordeaux's dye inks are cost effective and enable low use of ink per sq. meter due to its relative low absorption on the substrate. It has excellent color gamut and suitable for a wide variety of coated and a selection of uncoated materials.

## Advantages

- Low ink consumption
- Compatibility to a large variety of substrates
- Wide color gamut
- Advanced fast drying formulation for high productivity modes
- Excellent adhesion
- In-house, fully controlled manufacturing process
- Available in 1L and 5L bulk bottles and ink cartridges compatible with your printer
- Not regulated for transport - non hazardous
